

# Your day in plastic

Think of a typical day and when you or someone around use plastic things. Write down what plastic is used, then think of what could be used instead.

## In the morning

Think about what you use in the bathroom, kitchen, on the way to school

## During the day

Think about school, lunch, playing, what you wear

## During the evening

Think about dinner, technology, pets, sleep

## When travelling

Think of how to go places, what you need
