

Time for a rain check

There are many things we can do in our world to help keep the earth cooler—like reducing pollution and waste every day, in small and big ways—what do you think?

What energy do you use? What change could you make to use less energy or greener energy?

What things do you use every day? What could you reuse or improve?

What stuff do you put in the bin every day? Can you waste less?

What pollution do you see where you live? What could change that?
